Frugivores and seed dispersal (1985–2010); the seeds dispersed . A frugivore /fru?d??v??r/ is a fruit eater. It can be any type of herbivore or omnivore where fruit is a preferred food type. Because approximately 20% of all mammalian herbivores also eat fruit, frugivory is common among mammals. Since frugivores eat a lot of fruit, they are highly dependent on the The advantages of seed dispersal may have led to the evolution of fleshy Seed dispersal and frugivory : ecology, evolution and conservation .
